

Taking the test offline

To use the offline version you will first need to download and install the offline software. You can get this from www.marlins.co.uk/downloads.htm

Please note the zip file password is **Sunsail**

You can use this file to install the offline version on any number of PCs. Once installed you will need to license your software with the number of tests you wish to use. To do so:

- At the offline PC start the Marlins Admin Program
- Very carefully take a note of (or copy) the serial number under "licensing".
- Go to your online account and select "Generate test(s) to be taken on a CD ROM based computer"
- Carefully enter (or paste) the serial number into the box and the number of tests you wish to generate for the offline PC.
- This will generate your License code. Enter this carefully into the offline PC in the Marlins Admin program.
- Your offline PC will now have tests available.

To take a test launch the Marlins Test Program.
